The image shows a dual-monitor setup. The left monitor displays the GitHub profile page for 'Bahara12'. At the top, there is a yellow warning banner stating: 'GitHub includes you in this requirement. You will need to enable two-factor authentication on your account before April 21, 2024, or be restricted from account actions.' Below this, the profile name 'Bahara12' is visible next to a blue and white avatar icon. There are buttons for 'Set status', 'Edit profile', and a prominent green 'New' button. A search bar labeled 'Find a repository...' and filters for 'Type', 'Language', and 'Sort' are also present. At the bottom, a repository titled 'study_2022-2023_os-intro' is shown with a 'Public' label and 'Star' button.

The right monitor shows a terminal window with the output of a 'git init' command. The output lists installed hooks and their permissions:

- Это запускается `git pull --autostash --rebase` в вашем исходном каталоге, а `chezmoi diff` затем показывает разницу между целевым состоянием, вычисленным из вашего исходного каталога, и фактическим состоянием.
- Если вы довольны изменениями, вы можете применить их:

```
[babdullakhi@babdullakhi .password-store]$ chezmoi apply
[babdullakhi@babdullakhi .password-store]$
```
